Hi Dayna and Sam!

I don't know there's any urgency to look at these, but wanted to loop you in since it looks like Carolyn is out tomorrow, and that's what her out-of-office tells me to do ☺

Re: the multi-year agenda, I don't know what the latest is from OMB, so I'm at best 50:50 whether we'll really release on December 4th.

Hope you two have a fabulous thanksgiving!

Subject: Updated materials for IRIS announcements - multi-year agenda and V2O5 statement

Hi all,

I've attached a few documents to this email:

- 1) The current draft of the multi-year agenda, with edits to remove V2O5 from the list, and updated text describing the reason for that decision.
- 2) Communications plan for the release of the multi-year agenda. Updated with some chemical-specific background information on the two chemicals that we expect might get more attention (V2O5 and dioxin), and updated Q&A's. It has a timeline for the rollout starting November 30th with notification to Agency reviewers. We are still holding to a December 4th release of the agenda, but that's pending outreach to, and hearing back from, OMB on an informational briefing. Please let us know as soon as you hear anything on that front (I'm kind of out-of-pocket the next few days – I've cc'd Mary Ross and Lynn Flowers for awareness in case things need to happen to keep the ball rolling on scheduling the briefing).
- 3) Draft text to add to the V2O5 landing page, explaining the decision to not finalize the assessment and roll it into a vanadium and compounds assessment that is a future start. We think this is responsive to input Tom provided when discussing how to handle V2O5, but are looking for any comments/clarifications you might want to add. This language would have to go up on the web page the same day that the multi-year agenda is released.

I think that's everything. I'll be on email intermittently if anything comes up.

Happy Thanksgiving to all!

-Lou
